Install WooCommerce

How to install WooCommerce

To do an automatic install of WooCommerce log in to your WordPress admin panel and go to: Plugins > Add New.

In the search field type "WooCommerce" and click Search Plugins. Once you've found the plugin you can view details about it such as the point release, rating and description. Most importantly of course, you can install it by simply clicking Install Now. After clicking that link you will be asked if you're sure you want to install the plugin. Click "yes" and WordPress will automatically complete the installation.
